Summary

Full-stack engineer driving end-to-end product development from ideation and research to design and implementation. Experienced in building innovative, AI-driven solutions with a strong focus on user experience, scalability, and real-world impact.

Experience

- Full-stack Intern, Bioquix** (March 2025 - May 2025)
Tech Stack: React, Figma, TailwindCSS, Supabase, FastAPI, ReactFlow, 3Dmol.js, GSAP, Git
 - Designed and developed the entire **Agentic platform UI**, including complex features like a **workflow editor**, **AI-powered chat interface**, **dashboard** with **analytics** and **visualizations**, and a **protein editor** using 3Dmol.js for molecular structures.
 - Defined the **design language**, **color system**, and **interaction patterns** across the platform, ensuring consistency and modern UX.
 - Implemented **authentication flows** and integrated **Supabase** for secure user management.
 - Proactively gathered requirements, conducted research, and delivered high-fidelity mockups and production-ready code, fast iteration cycles ideal for startup environments.
 - Contributed to the **Bioquix main website**, refining UI/UX, improving responsiveness, and adding features based on user feedback.
- Front-end Intern, Unified Mentor** (November 2024 - January 2025)
Tech Stack: React, TailwindCSS, Supabase, GSAP, Git
 - Designed and developed responsive web interfaces for **industrial projects** using FE frameworks.
 - Adhered to **agile methodologies** to ensure smooth project workflows and iterative improvements.

Projects

- Podcastr**
Tech Stack: Next.js, TypeScript, TailwindCSS, OpenAI, Clerk, Convex [\[Github\]](#)
 - Built a **full-stack podcast platform** with **secure authentication** using **Clerk** and **AI-generated audio/thumbnails** via **OpenAI**.
 - Designed dynamic UI and a persistent **media player** to boost user engagement.
 - Implemented backend logic with **Convex** for real-time **content delivery** and **interaction**.
- Bioquix Platform**
Tech Stack: React.js, Figma, TailwindCSS, ReactFlow, Supabase, GSAP, 3Dmol.js
 - Developed a modern, responsive **platform UI** from **Figma to production**, featuring an **AI chatbot interface** and **animated workflows**.
 - Built interactive **pricing visuals** and a **3D molecular structure editor** using 3Dmol.js.
 - Integrated **secure user authentication** with **Supabase** for access control.
- Bioquix Website**
Tech Stack: React.js, Figma, TailwindCSS, Supabase, GSAP
 - Developed a **product showcase** for an upcoming AI tool with **intuitive navigation** and cohesive **visual design**.
 - Implemented a **Supabase-powered waitlist feature** to capture and manage user leads.
 - Maintained **clean, collaborative workflows** using Git for seamless team integration.

Technical Skills

Languages	JavaScript/TypeScript, C++, HTML/CSS, SQL
Frameworks	Node.js, Express.js, NextJS, Tailwind CSS, Radix UI, GSAP, 3Dmol.js, ReactFlow, Framer
DevOps & Cloud	Docker, Git, AWS, Google Cloud, Vercel, Supabase
Security	OAuth 2.0, Clerk, JWT
Databases	PostgreSQL, MongoDB, MySQL, Convex
Other	RESTful APIs, Prisma ORM, Zod, GitHub, OpenAI, Figma,

Achievements

- Cohort 100xDevs** – Completed full-stack web development course, focused on scalable and secure architectures.
- 150+ Problems Solved on LeetCode**

Education

2021 - 2025 Computer Science and Engineering, Vellore Institute of Technology
